

## CARA MENJALANKAN PROGTAM

1. Buka Terminal kemudian masuk kedalam direktory skripsi
2. Jalankan perintah “go mod tidy”
3. Jalankan perintah “go build -o bin/sso cmd/sso/main.go”
4. Lalu jalankan program dengan menuliskan “./bin/sso” pada Terminal, berikut jika program berhasil dijalankan:

A screenshot of a terminal window with a dark background. The title bar at the top reads './bin/sso'. The terminal shows a prompt 'skripsi' followed by the command './bin/sso'. The output consists of a JSON log entry: '{"level":"debug","time":"2019-08-22T22:49:04+07:00","message":"postgres"}' and a status message: '2019/08/22 22:49:04 Listening on http://localhost:8080'. A cursor is visible on the line following the status message.

```
skripsi ./bin/sso
{"level":"debug","time":"2019-08-22T22:49:04+07:00","message":"postgres"}
2019/08/22 22:49:04 Listening on http://localhost:8080
```
